

Car System Master Tape

Characteristics:

Master Tape is a slightly creped, flexible masking tape with excellent elongation characteristics and a high initial adhesion strength. This product is suitable for masking jobs for wet sanding as well as for solvent-based or water-based application of color paints with subsequent drying in a drying booth. It will adhere to painted metal, rubber, glass or chrome parts. After the vehicle leaves the drying booth, Master Tape comes off cleanly and leaves no residue.

Uses:

Professional-quality masking tape for reliable overspray protection during application processes with subsequent booth drying up to 120°C.

Product data:

Material data:

(Average values)	Backing material:	Special paper
	Total thickness:	170 µm
	Adhesive power on steel (N / 10 mm):	8.75
	Tensile strength (N / 15 mm)	105
	Elongation at tear:	13 %
	Heat resistance:	120 °C
	stability in storage (20°C / 50% RH):	18 month

Dimensions:

Standard roll length:	50 m
Widths:	15, 19, 25, 30, 38, 50 mm
